**Subject:** Teleconference Number

FYI,

After yesterday's workshop, two issues remain to be addressed prior to SBC/Ameritech's March 6 ICC filing:

1. Benchmark #93 regarding Percent of Customer Accounts Restructured Prior to LNP Due Date, and
2. Firm Order Confirmation (FOC) parity measurements

Other than these two issues, it is my understanding that the collaborative group is in agreement regarding the proposed SBC/Ameritech Illinois treatment of the 122 Texas Benchmarks, and the availability of parity measures.

We will address these two issues via conference bridge on Monday, February 28 from 2:30 to 4:30 (if needed). The dial in number is (505)242-2204, and the code is 671271.

If anyone has a proposal (particularly about FOC parity) before the 28th, please do not hesitate to distribute the proposal to the entire group ASAP. I continue to hope that the collaborative effort will avoid the need for formal proceedings.
